

## **The AZEK Company Announces Innovative New Building Products from TimberTech® Including The Landmark Collection™**

**Chicago, Ill., - February 9, 2021** – The AZEK Company (NYSE: AZEK), an industry-leading manufacturer of low-maintenance and sustainable residential and commercial building products, today announced innovative new products from its TimberTech brand, a leader in premium decking and railing. Available this spring, the products include the TimberTech® AZEK® Landmark Collection™ and new railing options.

### **New TimberTech AZEK Decking – The Landmark Collection**

The all-new Landmark Collection is the latest extension of the premium TimberTech AZEK capped polymer decking line and uses advanced technology to create the most natural wood look yet, bringing on-trend interior flooring design to outdoor decking. Inspired by the in-demand look of rustic, reclaimed wood, the Landmark Collection features a natural woodgrain surface texture, complemented by unique crosscuts. Available in two new colors, Castle Gate™ and American Walnut™, the collection marks the first time TimberTech has applied its proprietary color-cascading technology to capped polymer boards, which blends several colors to produce sophisticated highlights and lowlights, resulting in the same board-to-board variation found in nature.

“Our relentless dedication to superior technology enables homeowners to go against the grain when it comes to creating their outdoor living spaces,” said Jesse Singh, CEO of The AZEK Company. “The new TimberTech AZEK Landmark Collection is the latest example of how we’re challenging the status quo. The combination of a unique design and cascading colors creates a stunning, nature-inspired visual that’s never been seen in the industry.”

Engineered with the same materials science as all TimberTech AZEK boards, the Landmark Collection is made from 100 percent synthetic material unlike traditional composite decking, which uses wood particles. The result is low-maintenance decking that stays cooler and offers unrivaled resistance to moisture, fading, scratching and staining. All TimberTech AZEK products are backed by an industry-leading limited lifetime warranty and a 50-year limited fade and stain warranty. Consistent with AZEK’s commitment to revolutionize outdoor living by building a more sustainable future, the capped polymer deck boards are made from approximately 50 percent recycled materials.

### **New TimberTech Railing Options**

The AZEK Company will also introduce several new products, as well as enhancements, to existing TimberTech railing lines, which complement the brand’s high-performance decking. New top-rail options for TimberTech® Impression Rail Express®, a pre-assembled aluminum railing system, include the Modern rail, which boasts a sleek and angular profile, and the Drink rail, which features a deck board on top of the railing that allows users to coordinate their decking with their railing. Additionally, TimberTech® RadianceRail Express® will add an aluminum baluster infill option to the long-lasting traditional railing line.
